# Codebook for replication data

**Article: "A Moveable Benefit? Spillover Effects of Quotas on Women's Numerical Representation". Forthcoming at *Political Research Quarterly*.**

**Authors: Komal Preet Kaur, Andrew Q. Philips**

A. Codebook for grpboth.rds

| Variable | Description |
|---|---|
| pc01_state_name | State name |
| pc01_state_id | Unique ID given to each state |
| Year | Year in which state elections are held |
| treat33_post | A binary variable coding first assembly election after the gram panchayat elections post-33% women's reservation as 1 and 0 otherwise. |
| treat50_post | A binary variable coding first assembly election after the gram panchayat election post-50% women's reservation as 1 and 0 otherwise. |
| treatedstate | A binary variable coding states with 50% women's reservation as 1 and 0 otherwise. |
| election_counter | A count of assembly elections beginning from 1 onwards signifying the oldest election in the dataset to the most recent election in the dataset. |
| sum.wom | Total women candidates in an assembly election |
| pc.wom | Percentage of women candidates from total candidates in an assembly election |
| vote.share.wom | Vote share percentage of women candidates in an assembly election |
| won.wom.overall | The percentage of women winners from total winners in an assembly elections |
| deposit.wom | The percentage of women candidates who lose their security amount deposited with the Election Commission of India (ECI) who fail to receive at least one-sixth of the total vote share in a constituency. |
| l.pc.wom | The percentage of women winners from total winners in the preceding assembly election |
| l.vote.share.wom | Vote share percentage of women candidates in the preceding assembly election |
| l.won.wom.overall | The percentage of women winners from total winners in the preceding assembly election |
| l.deposit.wom | The percentage of women candidates who lose their security amount deposited with the Election Commission of India (ECI) who fail to receive at least one-sixth of the total vote share in a constituency in the preceding assembly election. |

B. Codebook for grpbothcon.rds

| Variable | Description |
|---|---|
| pc01_state_name | State name |
| pc01_state_id | Unique ID given to each state |

| Year | Year in which state elections are held |
|---|---|
| treat33_post | A binary variable coding first assembly election after the gram panchayat elections post-33% women's reservation as 1 and 0 otherwise. |
| treat50_post | A binary variable coding first assembly election after the gram panchayat election post-50% women's reservation as 1 and 0 otherwise. |
| treatedstate | A binary variable coding states with 50% women's reservation as 1 and 0 otherwise. |
| election_counter | A count of assembly elections beginning from 1 onwards signifying the oldest election in the dataset to the most recent election in the dataset. |
| prob.con | Percentage of total races/assembly constituencies with at least one woman candidate |
| prob.con.won | Percentage of total races/assembly constituencies won by a woman |
| l.prob.con | Percentage of total races/assembly constituencies with at least one woman candidate in the preceding assembly election |
| l.prob.con.won | Percentage of total races/assembly constituencies won by a woman in the preceding assembly election |

C. Codebook for ttest_nfhs.xlsx

| Variable | Description |
|---|---|
| state | State name |
| quota_status | Whether a state has 50% women's reservation at gram panchayat level (assigned as "treated") or not (assigned as "control") |
| tfr | Total fertility rate (children per women) |
| imr | infant mortality rate (per 1000 live births) |
| sr | Sex ratio (per 1000 men) |
| son_pref | The percentage of women who prefer having sons over daughters |
| edu12 | Percentage of educated women (more than equal to 12 years) |
| edu10 | Percentage of women with 10+ years of education (high school and above) |
| emp | employment rate among married women |
